CLUE 5**Missing addends - the last clue**

The kitchen needs ten pizza pans to make the midnight feast, but some are missing from the shelf. Find how many more pans are needed to make a full set of ten.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$10 + \underline{\quad} = 18$

$9 + \underline{\quad} = 14$

$6 + \underline{\quad} = 12$

$3 + \underline{\quad} = 14$

$10 + \underline{\quad} = 20$

$7 + \underline{\quad} = 8$

$2 + \underline{\quad} = 14$

$6 + \underline{\quad} = 15$

$6 + \underline{\quad} = 13$

$5 + \underline{\quad} = 8$

$5 + \underline{\quad} = 7$

Step 2 - cross out the sentence with each answer:

1. The villain stands near the prize counter, then scares the night guard.
2. The villain stomps down the dark hallway, then scares the night guard.
3. The villain runs past the pirate cove, then swipes the spare batteries.
4. The villain stomps down the dark hallway, then makes a creepy robot laugh.
