

The Case of the Golden Kelp

Grade 5 math · Fractions of a number, Order of operations, Multiplication, Rounding, Division · Reading level grades 5-6

Detective: _____ Date: _____

The legendary Golden Kelp Codex has been stolen from the deepest shelf of the Great Coral Library! Help the Reef Patrol trace the clues, solve the math, and identify the thief before they escape to the deepest ocean trench.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Tome Thief is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

Fractions of a number

To begin the search, we must calculate the fraction of glowing coral pages left intact on the bookshelf.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Division facts (1-12) - the last clue**

We must divide a bucket of bioluminescent ink tablets equally among the patrol teams to map the trenches.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$108 \div 9 = \square$

$55 \div 11 = \square$

$20 \div 2 = \square$

$22 \div 2 = \square$

$6 \div 1 = \square$

$24 \div 8 = \square$

$6 \div 3 = \square$

$84 \div 12 = \square$

$2 \div 2 = \square$

$72 \div 8 = \square$

$12 \div 3 = \square$

Step 2 - cross out the sentence with each answer:

1. The villain swipes a glowing coral tome, then escapes through a trench.
2. The villain grabs a heavy seashell dictionary, then slips into the dark abyss.
3. The villain snatches an ancient kelp map, then hides behind a school of tuna.
4. The villain grabs a heavy seashell dictionary, then escapes through a trench.
5. The villain snatches an ancient kelp map, then escapes through a trench.
6. The villain pockets a jellyfish journal, then zips away on a manta ray.
7. The villain steals a rare waterproof scroll, then hides behind a school of tuna.
8. The villain steals a rare waterproof scroll, then zips away on a manta ray.
9. The villain snatches an ancient kelp map, then zips away on a manta ray.
10. The villain steals a rare waterproof scroll, then swims past the barrier reef.
11. The villain swipes a glowing coral tome, then zips away on a manta ray.
12. The villain swipes a glowing coral tome, then swims past the barrier reef.
