

The Case of the Golden Pineapple

Grade 1 math · Addition, Subtraction, Skip counting, Place value, Missing addends · Reading level grades 1-2

Detective: _____ Date: _____

Oh no! Someone took Chef Barnaby's famous Golden Pineapple from the beach kitchen! We need to find the sneaky pirate who did it. Look for clues around Coconut Cove!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the sneaky pirate is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1

We count the pirate hats on the ship. We add the blue hats and the red hats to get a total.

Solve each problem, then write its letter in every clue box that shows the same number.

A 2x10 grid of boxes. The top row contains the following sequence: an orange box with 'T', three empty boxes, an orange box with 'T', and six empty boxes. The bottom row contains the following sequence: two empty boxes, an orange box with 'T', and seven empty boxes.

Subtraction

We find a box of sweet snacks. Some snacks are gone. We subtract to find how many are left!

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Missing addends - the last clue**

We need ten map pieces. We have six. We find the missing number to complete our map!

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$8 + \underline{\quad} = 12$

$8 + \underline{\quad} = 18$

$6 + \underline{\quad} = 15$

$5 + \underline{\quad} = 17$

$5 + \underline{\quad} = 13$

$3 + \underline{\quad} = 6$

$4 + \underline{\quad} = 11$

$4 + \underline{\quad} = 9$

$3 + \underline{\quad} = 14$

$5 + \underline{\quad} = 7$

$8 + \underline{\quad} = 14$

Step 2 - cross out the sentence with each answer:

1. The villain points a shiny compass, then feeds a tiny crab.
2. The villain digs a hole in the sand, then gives a banana to a monkey.
3. The villain points a shiny compass, then gives a banana to a monkey.
4. The villain points a shiny compass, then tosses fish to a seagull.
5. The villain throws a long rope lasso, then tosses fish to a seagull.
6. The villain points a shiny compass, then pets a green iguana.
7. The villain waves a shiny gold hook, then pets a green iguana.
8. The villain digs a hole in the sand, then tosses fish to a seagull.
9. The villain looks through a spyglass, then calls a green parrot.
10. The villain looks through a spyglass, then tosses fish to a seagull.
11. The villain digs a hole in the sand, then calls a green parrot.
12. The villain looks through a spyglass, then feeds a tiny crab.
