Grade 4 math · Rounding, Addition, Subtraction, Multiplication, Division · Reading level grades 3-4

Detective: _____ Date: _____

The Golden Tuna Statue has been swiped from the Purrville Museum! Mayor Whiskers needs the Kitty Squad to track down the sneaky cat burglar before the big fish feast tonight.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the cat burglar is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 5**Division facts (1-12) - the last clue**

We must split these shiny bell collars equally among the team. Divide them up to discover the villain's secret weakness.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$56 \div 7 = \boxed{}$

$10 \div 2 = \boxed{}$

$33 \div 3 = \boxed{}$

$30 \div 3 = \boxed{}$

$60 \div 10 = \boxed{}$

$3 \div 3 = \boxed{}$

$36 \div 9 = \boxed{}$

$20 \div 10 = \boxed{}$

$70 \div 10 = \boxed{}$

$3 \div 1 = \boxed{}$

$99 \div 11 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain leaped over the security lasers, then then hid behind the giant fish tank.
2. The villain leaped over the security lasers, then then meowed loudly at the moon.
3. The villain snuck through the cat flap door, then then took a quick catnap in the sun.
