

The Case of the Missing Diamond Block

Grade 4 math · Place value, Addition, Subtraction, Rounding, Missing addends · Reading level grades 3-4

Detective: _____ **Date:** _____

Someone snuck into the town square and grieved the giant diamond statue! The Lead Builder needs your help. We must trace the blocky footprints, crack the redstone codes, and find the sneaky griever before they ruin the whole server!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the griever is _____

Possible suspects

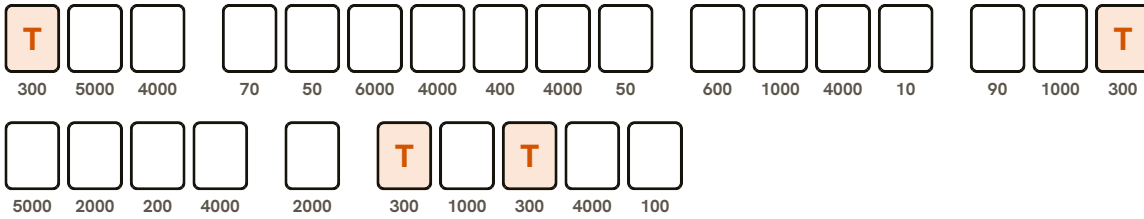

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1

We found a locked chest with a digital display. The numbers on the screen show the exact place values of the block count used to build the statue.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 2 Addition

To unlock the next clue, we have to count all the cobblestone and oak wood blocks the griefers dropped and add them together.

Solve each problem, then write its letter in every clue box that shows the same number.

Subtraction

A sneaky creeper blew up near the supply chest! We must subtract the ruined iron ingots from our total to see what remains.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 4 Rounding

Our coordinates tracker is fuzzy. We have to round the broken numbers to the nearest ten to find the griever's escape path.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Missing addends - the last clue**

The redstone repeater needs more dust to power up. We know the total charge needed, so we must calculate the missing amount to fix it.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$16 + \underline{\quad} = 19$

$31 + \underline{\quad} = 38$

$11 + \underline{\quad} = 19$

$29 + \underline{\quad} = 35$

$26 + \underline{\quad} = 35$

$40 + \underline{\quad} = 44$

$10 + \underline{\quad} = 20$

$11 + \underline{\quad} = 16$

$30 + \underline{\quad} = 31$

$34 + \underline{\quad} = 46$

$18 + \underline{\quad} = 29$

Step 2 - cross out the sentence with each answer:

1. The villain brewed a splash potion of speed, then soared away using an elytra.
2. The villain hacked the redstone door open, then threw a loyalty trident.
3. The villain brewed a splash potion of speed, then threw a loyalty trident.
4. The villain built a bridge over the lava, then teleported with an ender pearl.
5. The villain brewed a splash potion of speed, then teleported with an ender pearl.
6. The villain built a bridge over the lava, then soared away using an elytra.
7. The villain walked right across the lava lake, then threw a loyalty trident.
8. The villain walked right across the lava lake, then soared away using an elytra.
9. The villain hacked the redstone door open, then teleported with an ender pearl.
10. The villain hacked the redstone door open, then blocked an arrow with a shield.
11. The villain walked right across the lava lake, then teleported with an ender pearl.
12. The villain tamed a pack of wild wolves, then teleported with an ender pearl.
