Grade 4 math · Addition, Rounding, Subtraction, Multiplication, Division · Reading level grades 5-6

Detective: _____ Date: _____

The legendary Golden Cleat trophy has been swiped right from the display case at Wembley Stadium! A rogue player snuck into the locker rooms and took it. It's up to you to crack the case before the final whistle!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the rogue player is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

Multiplication facts (1-12)

The stadium groundskeepers laid out new training cones in equal rows on the practice field. Let's multiply the rows to find the secret message hidden underneath.

Solve each problem, then write its letter in every clue box that shows the same number.

The diagram consists of two rows of boxes. The top row has 18 boxes in total, with the 5th and 16th boxes containing the letter 'A'. The numbers below the top row are: 18, 15, 12, 64, 18, 49, 36, 88, 55, 27, 36, 55, 144, 80, 16, 27, 40, 18, 15. The bottom row has 15 boxes in total, with the 9th box containing the letter 'A'. The numbers below the bottom row are: 110, 64, 36, 49, 49, 27, 110, 55, 27, 18, 64, 12, 14, 27, 55, 27, 12.

CLUE 5**Division facts (1-12) - the last clue**

We need to divide the extra soccer jerseys equally among the youth teams. Solve the division to uncover the final piece of evidence.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$80 \div 10 = \boxed{}$

$30 \div 10 = \boxed{}$

$14 \div 7 = \boxed{}$

$33 \div 3 = \boxed{}$

$42 \div 7 = \boxed{}$

$24 \div 2 = \boxed{}$

$99 \div 11 = \boxed{}$

$2 \div 2 = \boxed{}$

$25 \div 5 = \boxed{}$

$50 \div 5 = \boxed{}$

$56 \div 8 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain bypassed the security guards, then vaulted over the high fence.
2. The villain blasted a shot into the lights, then clung to the metal ceiling with magnetic guards.
3. The villain flicked the ball over the wall, then escaped using super speed.
4. The villain flicked the ball over the wall, then clung to the metal ceiling with magnetic guards.
5. The villain sprinted past the corner flag, then vaulted over the high fence.
6. The villain bypassed the security guards, then sprung high into the stadium rafters.
