

The Golden Dino Egg Mystery

Grade 4 math · Place value, Addition, Subtraction, Multiplication, Division · Reading level grades 3-4

Detective: _____ Date: _____

Someone has swiped the Golden Triceratops Egg from the sanctuary hatchery! Chief Park Ranger Mary needs your math skills to track down the sneaky dino before the egg hatches.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Rogue Dino is _____

Possible suspects

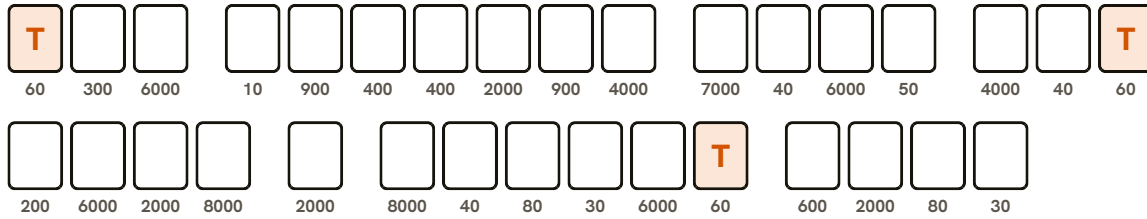

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1 Place value

We look at the digital incubator readout. The display lights are scrambled, but understanding the value of the hundreds place will unlock the first clue.

Solve each problem, then write its letter in every clue box that shows the same number.

What is the value of the 6 in 2,563? → **T**

CLUE 2 Addition

We count the giant footprints leading away from the hatchery. Adding the tracks in the mud and the tracks in the sand gives us the exact count we need.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Division facts (1-12) - the last clue**

The ranger needs to share the energy snacks equally among the search teams. Dividing the boxes of snacks tells us which trail to follow next.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$48 \div 6 = \boxed{}$

$108 \div 9 = \boxed{}$

$55 \div 11 = \boxed{}$

$2 \div 2 = \boxed{}$

$110 \div 11 = \boxed{}$

$56 \div 8 = \boxed{}$

$44 \div 11 = \boxed{}$

$55 \div 5 = \boxed{}$

$33 \div 11 = \boxed{}$

$9 \div 1 = \boxed{}$

$14 \div 7 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain rolls like a giant spike ball, then zooms off with a rocket pack.
2. The villain leaps over the hot bubbling lava, then stomps around in hot lava boots.
3. The villain sprints through the dense fern forest, then rattles heavy steel armor.
4. The villain leaps over the hot bubbling lava, then pings everyone with a sonar collar.
5. The villain leaps over the hot bubbling lava, then flashes a bright prism visor.
6. The villain smashes the ancient stone wall, then pings everyone with a sonar collar.
7. The villain smashes the ancient stone wall, then flashes a bright prism visor.
8. The villain rolls like a giant spike ball, then pings everyone with a sonar collar.
9. The villain sprints through the dense fern forest, then zooms off with a rocket pack.
10. The villain leaps over the hot bubbling lava, then rattles heavy steel armor.
11. The villain shakes the valley floor, then pings everyone with a sonar collar.
12. The villain rolls like a giant spike ball, then rattles heavy steel armor.
