

The Great Blox Bowl Heist

Grade 5 math · Rounding, Multiplication, Subtraction, Addition, Division · Reading level grades 5-6

Detective: _____ **Date:** _____

Just before the kickoff of the Roblox Ultimate Football Championship, the Golden Game Ball went missing! The security monitors glitched, and a mysterious player known only as the Lag Bandit escaped into the server lobby. Use your math skills and detective logic to track down the thief before the game gets canceled!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Lag Bandit is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1 Rounding

The score display in the Roblox Football stadium is glitched and only displays numbers rounded to the nearest hundred. We have to decode the true attendance count to unlock the server security room.

Solve each problem, then write its letter in every clue box that shows the same number.

Multiplication facts (1-12)

The coach found rows of identical digital trade boxes stacked near the lockers. Multiplying the boxes by the trading cards inside each box will tell us which vault key we need.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Division facts (1-12) - the last clue**

We need to split the remaining Robux coins equally among the safety team members to pay for the server upgrades and find the final IP address.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$20 \div 4 = \boxed{}$

$63 \div 9 = \boxed{}$

$96 \div 12 = \boxed{}$

$120 \div 10 = \boxed{}$

$27 \div 3 = \boxed{}$

$8 \div 8 = \boxed{}$

$18 \div 3 = \boxed{}$

$80 \div 8 = \boxed{}$

$99 \div 9 = \boxed{}$

$44 \div 11 = \boxed{}$

$33 \div 11 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain leaped high with a super jump, then grabbed the trophy to earn double coins.
2. The villain activated a neon speed coil, then ran forever using infinite stamina.
3. The villain snatched the ball with magnetic hands, then blocked defenders behind an ice shield.
4. The villain threw a sixty yard laser pass, then ran forever using infinite stamina.
5. The villain snatched the ball with magnetic hands, then towered over everyone as a giant avatar.
6. The villain activated a neon speed coil, then scorched the field leaving a fire trail.
7. The villain boosted downfield using rocket cleats, then towered over everyone as a giant avatar.
8. The villain leaped high with a super jump, then ran forever using infinite stamina.
9. The villain threw a sixty yard laser pass, then towered over everyone as a giant avatar.
10. The villain threw a sixty yard laser pass, then blocked defenders behind an ice shield.
11. The villain boosted downfield using rocket cleats, then blocked defenders behind an ice shield.
12. The villain leaped high with a super jump, then blocked defenders behind an ice shield.
