Grade 6 math · Multiplication, Percentages, Exponents, Order of operations, Division · Reading level grades 1-2

Detective: _____ Date: _____

Oh no! A sneaky rogue bot grabbed the Golden Gear from the Lead Inventor. The bot ran into the charging dock to hide. We must find them!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the rogue bot is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 5**Division facts (1-12) - the last clue**

The oil cans must be shared equally among the small helper bots. Each bot gets the same amount. Solve this division puzzle for the last clue.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$24 \div 8 = \boxed{}$

$110 \div 10 = \boxed{}$

$8 \div 4 = \boxed{}$

$10 \div 10 = \boxed{}$

$108 \div 9 = \boxed{}$

$36 \div 6 = \boxed{}$

$8 \div 1 = \boxed{}$

$7 \div 1 = \boxed{}$

$28 \div 7 = \boxed{}$

$72 \div 8 = \boxed{}$

$110 \div 11 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain blasts a laser beam, then flashes a holo screen.
2. The villain flies with a jet boost, then shines night vision.
3. The villain jumps with a super spring, then flashes a holo screen.
4. The villain uses a metal magnet, then flashes a holo screen.
5. The villain jumps with a super spring, then throws a spark punch.
6. The villain blasts a laser beam, then shines night vision.
7. The villain flies with a jet boost, then flashes a holo screen.
8. The villain blasts a laser beam, then makes a sonic beep.
9. The villain zooms on turbo wheels, then unfolds a solar panel.
10. The villain uses a metal magnet, then makes a sonic beep.
11. The villain uses a metal magnet, then shines night vision.
12. The villain flies with a jet boost, then unfolds a solar panel.
