Detective: _____ Date: _____

Oh no! The Golden Fish Trophy is missing from the kitty clubhouse! A sneaky cat took it. Detective Paw needs your help to find the right kitty and get the trophy back!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the The Catnap Caperer is _____

Possible suspects

CLUE 5**Division facts (1-12) - the last clue**

Four hungry kittens want to share a bowl of milk treats. When we divide the treats equally, the leftover number gives us our final clue!

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$15 \div 3 = \boxed{}$

$72 \div 9 = \boxed{}$

$54 \div 9 = \boxed{}$

$24 \div 12 = \boxed{}$

$70 \div 10 = \boxed{}$

$90 \div 9 = \boxed{}$

$24 \div 8 = \boxed{}$

$8 \div 2 = \boxed{}$

$54 \div 6 = \boxed{}$

$88 \div 8 = \boxed{}$

$10 \div 10 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain leaps over the tall park fence, then rolls a giant ball of yarn.
2. The villain creeps through the soft grass, then waves a colorful feather wand.
3. The villain dashes past the sleeping dogs, then sets up an empty cardboard box.
4. The villain walks across the skinny wire, then rolls a giant ball of yarn.
5. The villain leaps over the tall park fence, then sets up an empty cardboard box.
6. The villain scales the brick garden wall, then sprays a puff of sweet catnip.
