Detective: _____ **Date:** _____

The championship match is about to start, but the shiny Golden Cup has been stolen! A tricky soccer player swapped the trophy with a squeaky plastic toy. The referee found a list of suspects, but we need your math skills to help us crack the case and save the big game!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Cleat Bandit is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 5**Missing addends - the last clue**

The equipment bag holds twelve shin guards. We only see eight on the grass, so we must find how many are still missing inside.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$2 + \underline{\quad} = 9$

$3 + \underline{\quad} = 8$

$9 + \underline{\quad} = 13$

$4 + \underline{\quad} = 14$

$5 + \underline{\quad} = 7$

$9 + \underline{\quad} = 21$

$8 + \underline{\quad} = 17$

$8 + \underline{\quad} = 16$

$2 + \underline{\quad} = 8$

$8 + \underline{\quad} = 9$

$3 + \underline{\quad} = 6$

Step 2 - cross out the sentence with each answer:

1. The villain takes the goalie gloves, then escapes down the players tunnel.
2. The villain hides the championship banner, then escapes down the players tunnel.
3. The villain steals the official game ball, then leaps over the stadium fence.
4. The villain steals the official game ball, then sprints across the muddy field.
5. The villain snatches the referee whistle, then leaps over the stadium fence.
6. The villain swipes the golden trophy, then leaps over the stadium fence.
