Grade 4 math · Multiplication, Fractions of a number, Rounding, Addition · Reading level grades 3-4

Detective: _____ Date: _____

Oh no! Someone has snuck into the Golden Fish Market and snatched the legendary Sparkly Salmon! Detective Whiskers of the Mew-York Police Department needs your help to crack the case and find the thief.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the the Catnip Bandit is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

Multiplication facts (1-12)

Detective Whiskers finds a stack of canned tuna arranged in neat rows. To find the total cans, we must multiply the rows together.

Solve each problem, then write its letter in every clue box that shows the same number.

Diagram illustrating the decomposition of 110 into prime factors using boxes. The boxes are arranged in two rows. The top row shows 110 as 6 * 2 * 110, then 6 * 2 * 110 as 8 * 44 * 50 * 30 * 66 * 6, then 6 * 2 * 110 as 30 * 4 * 110 * 11, then 6 * 2 * 110 as 50 * 4 * 6, then 6 * 2 * 110 as 9 * 11 * 110. The bottom row shows 6 * 2 * 110 as 44 * 15 * 110 * 44 * 6 * 2 * 110 * 40, then 6 * 2 * 110 as 5 * 44 * 50 * 30.

CLUE 5**Fractions of a number - the last clue**

The friendly neighborhood birds saw the bandit run past. If they share a box of crackers, we can find out who gets the biggest fraction.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$2/4 \text{ of } 14 = \boxed{}$

$4/6 \text{ of } 9 = \boxed{}$

$1/4 \text{ of } 20 = \boxed{}$

$4/10 \text{ of } 25 = \boxed{}$

$4/8 \text{ of } 8 = \boxed{}$

$1/4 \text{ of } 36 = \boxed{}$

$2/3 \text{ of } 3 = \boxed{}$

$2/10 \text{ of } 40 = \boxed{}$

$2/8 \text{ of } 4 = \boxed{}$

$4/8 \text{ of } 24 = \boxed{}$

$2/10 \text{ of } 55 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain pounced silently from above, then rang a tiny shiny bell.
2. The villain pounced silently from above, then waved a bright feather wand.
3. The villain scratched the wooden walls, then blocked the security cameras with a cardboard shield.
4. The villain chased down the delivery van, then blocked the security cameras with a cardboard shield.
5. The villain pounced silently from above, then distracted the watchdogs with a squeaky mouse.
6. The villain jumped over the high fence, then distracted the watchdogs with a squeaky mouse.
7. The villain scratched the wooden walls, then rang a tiny shiny bell.
8. The villain meowed loudly to distract the guards, then rang a tiny shiny bell.
9. The villain pounced silently from above, then blocked the security cameras with a cardboard shield.
10. The villain pounced silently from above, then shined a glowing laser pointer.
11. The villain chased down the delivery van, then rang a tiny shiny bell.
12. The villain meowed loudly to distract the guards, then shined a glowing laser pointer.
