

The Great Griefer of Craftia

Grade 7 math · Addition, Subtraction, Multiplication, Rounding, Division · Reading level grades 7-9

Detective: _____ **Date:** _____

An unknown player has bypassed spawn protections and grieved the server's magnificent spawn castle! Cobblestone is everywhere, lava is pouring down the castle walls, and the diamond block throne is completely gone. As the chief investigator, you must decode the server logs, complete the math puzzles, and find the culprit before the entire server crashes.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Griefer is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.
