

The Great Hat Town Caper

Grade 2 math · Addition, Subtraction, Rounding, Place value, Missing addends · Reading level grades 1-2

Detective: _____ Date: _____

Welcome to Hat Town! Everyone here loves hats. But last night, a sneaky Hat Swiper took the Mayor's golden crown hat. We need to find the swiper before the big Hat Parade starts!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Hat Swiper is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

Subtraction

The Swiper dropped a bag of silver buttons. We had ten but some rolled away. Subtracting them tells us which path to take.

Solve each problem, then write its letter in every clue box that shows the same number.

Place value (tens & ones)

The Swiper left boxes of hat pins. Some boxes have ten pins and some have single pins. Count the tens and ones to find the clue.

Solve each problem, then write its letter in every clue box that shows the same number.

What number has 6 tens and 1 one?

→ **W**

What number has 1 ten and 1 one?

→ **P**

What number has 9 tens and 2 ones?

→ **U**

What number has 9 tens and 5 ones?

CLUE 5**Missing addends - the last clue**

The hat rack holds twelve hats but some are missing. Find the missing number to unlock the Swiper's hair color clue.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$2 + \underline{\quad} = 6$

$1 + \underline{\quad} = 6$

$10 + \underline{\quad} = 17$

$7 + \underline{\quad} = 9$

$5 + \underline{\quad} = 16$

$4 + \underline{\quad} = 10$

$1 + \underline{\quad} = 11$

$10 + \underline{\quad} = 19$

$1 + \underline{\quad} = 9$

$7 + \underline{\quad} = 19$

$1 + \underline{\quad} = 2$

Step 2 - cross out the sentence with each answer:

1. The villain steals a fuzzy winter hat, then sneaks behind the toy shop.
2. The villain snatches a blue bowler hat, then sneaks behind the toy shop.
3. The villain grabs a tall chef hat, then sneaks behind the toy shop.
4. The villain grabs a tall chef hat, then hides in the hollow oak tree.
5. The villain plucks a fancy crown hat, then zips away on a red scooter.
6. The villain steals a fuzzy winter hat, then zips away on a red scooter.
7. The villain plucks a fancy crown hat, then sneaks behind the toy shop.
8. The villain takes a sunny straw hat, then zips away on a red scooter.
9. The villain takes a sunny straw hat, then runs down the windy alley.
10. The villain steals a fuzzy winter hat, then climbs up the clock tower.
11. The villain grabs a tall chef hat, then climbs up the clock tower.
12. The villain takes a sunny straw hat, then hides in the hollow oak tree.
