Grade 5 math · Rounding, Fractions of a number, Order of operations, Multiplication, Division · Reading level grades 3-4

Detective: _____ Date: _____

Oh no! A sneaky thief has swapped the priceless Mona Lisa with a silly crayon drawing! We must help the museum staff search the grand halls of Paris, check the clues, and find the culprit before the tourists arrive.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Art Thief is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1 Rounding

We checked the digital ticket scanner near the statue. The screen only shows rounded numbers to the nearest ten. Round the visitor count to find our first big clue!

Solve each problem, then write its letter in every clue box that shows the same number.

Fractions of a number

The culprit dropped a tray of watercolor paints. A fraction of the colors are smeared, but counting the clean ones will tell us how the villain writes!

Solve each problem, then write its letter in every clue box that shows the same number.

Order of operations

To open the locked security room door, we must solve a multi-step math equation on the keypad. Solve the steps in the correct order to reveal their main weakness!

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Division facts (1-12) - the last clue**

The guards found a box of stolen art supplies in the garden. Divide these items equally among the search teams to locate the final clue!

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$20 \div 5 = \boxed{}$

$56 \div 7 = \boxed{}$

$2 \div 2 = \boxed{}$

$66 \div 6 = \boxed{}$

$9 \div 1 = \boxed{}$

$14 \div 2 = \boxed{}$

$30 \div 3 = \boxed{}$

$24 \div 8 = \boxed{}$

$12 \div 1 = \boxed{}$

$15 \div 3 = \boxed{}$

$14 \div 7 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain painted over the secret museum map, then jumped into a waiting taxi cab.
2. The villain swapped the portrait with a copy, then blended in with a tour group.
3. The villain swapped the portrait with a copy, then jumped into a waiting taxi cab.
4. The villain painted over the secret museum map, then ran down the grand spiral stairs.
5. The villain swapped the portrait with a copy, then escaped through the glass pyramid.
6. The villain drew a mustache on the statue, then jumped into a waiting taxi cab.
7. The villain hid the ancient vase in a bin, then escaped through the glass pyramid.
8. The villain took the golden frame off the wall, then escaped through the glass pyramid.
9. The villain took the golden frame off the wall, then ran down the grand spiral stairs.
10. The villain hid the ancient vase in a bin, then blended in with a tour group.
11. The villain drew a mustache on the statue, then blended in with a tour group.
12. The villain drew a mustache on the statue, then escaped through the glass pyramid.
