

The Great Prism Valley Capers

Grade 5 math · Fractions of a number, Order of operations, Multiplication, Rounding, Division · Reading level grades 5-6

Detective: _____ Date: _____

The peaceful meadows of Prism Valley are in a panic! A rogue unicorn has snuck into the royal stables and stolen the mythical Starstone. As lead detective of the Glitter Guard, you must track down the culprit before the valley loses its beautiful rainbows forever.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Rogue Unicorn is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1 Fractions of a number

We found a torn recipe for magic cloud-bread near the scene. Only a fraction of the golden flour was used, and we need to calculate that portion to find our first lead.

Solve each problem, then write its letter in every clue box that shows the same number.

Order of operations

A magical combination lock blocks the star-gate. To crack the code and trace the culprit, we must solve a tricky sequence of symbols using the strict order of operations.

Solve each problem, then write its letter in every clue box that shows the same number.

Multiplication facts (1-12)

The stables keep neat rows of glowing star-carrots. Counting these equal groups will help us figure out how many rations the thief swiped for their escape.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 4 Rounding

Our magic radar screen is blurry from glitter interference. It only shows the villain's flight path rounded to the nearest ten leagues, so we have to estimate carefully.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Division facts (1-12) - the last clue**

We recovered a sack of sparkling star-gems dropped during the escape. Sharing them equally among our tracking squads will reveal the exact coordinates of the hideout.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$18 \div 6 = \boxed{}$

$24 \div 4 = \boxed{}$

$64 \div 8 = \boxed{}$

$4 \div 2 = \boxed{}$

$42 \div 6 = \boxed{}$

$30 \div 3 = \boxed{}$

$110 \div 10 = \boxed{}$

$99 \div 11 = \boxed{}$

$48 \div 4 = \boxed{}$

$32 \div 8 = \boxed{}$

$9 \div 9 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain swiped the magic horn-polish, then galloped through the star-gate.
2. The villain shattered the prisma-crystal, then hopped onto a storm cloud.
3. The villain swiped the magic horn-polish, then sprinted into the whispering woods.
4. The villain swiped the magic horn-polish, then vanished in a pink puff.
5. The villain nicked the silver bridle, then hopped onto a storm cloud.
6. The villain stole the golden clover, then sprinted into the whispering woods.
7. The villain stole the golden clover, then vanished in a pink puff.
8. The villain nicked the silver bridle, then galloped through the star-gate.
9. The villain scrambled the stardust map, then galloped through the star-gate.
10. The villain shattered the prisma-crystal, then vanished in a pink puff.
11. The villain nicked the silver bridle, then sprinted into the whispering woods.
12. The villain scrambled the stardust map, then dashed down the rainbow path.
