

The Great Treehouse Camp Mystery

Grade 1 math · Addition, Subtraction, Skip counting, Place value, Missing addends · Reading level grades 1-2

Detective: _____ Date: _____

Oh no! The Golden Marshmallow Trophy is gone! Someone took it from the main campfire circle right before the big camp party. Leader Sam needs your help to follow the clues, track down the sneaky culprit, and save the summer camp celebration!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Camp Bandit is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1 **Addition**

We find a notepad on the ground. We add three blue pens and four red pens to count the clues.

Solve each problem, then write its letter in every clue box that shows the same number.

Subtraction

The camp kitchen is messy. We had ten apples but five are missing now. This points us to the next hint.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 3 Skip counting

We follow muddy boot prints on the trail. We count them by twos to see where they go.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Missing addends - the last clue**

The snack box needs eight juice boxes. There are only six inside. We must find how many are gone.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$7 + \underline{\quad} = 8$

$10 + \underline{\quad} = 17$

$1 + \underline{\quad} = 13$

$4 + \underline{\quad} = 13$

$4 + \underline{\quad} = 9$

$6 + \underline{\quad} = 14$

$8 + \underline{\quad} = 18$

$6 + \underline{\quad} = 10$

$6 + \underline{\quad} = 17$

$10 + \underline{\quad} = 16$

$6 + \underline{\quad} = 8$

Step 2 - cross out the sentence with each answer:

1. The villain sneaks past the sleeping tents, then disappears into the tall ferns.
2. The villain sneaks past the sleeping tents, then hides in the hollow oak.
3. The villain climbs up the wooden ladder, then hides in the hollow oak.
4. The villain sneaks past the sleeping tents, then jumps over the campfire logs.
5. The villain swings on a rope bridge, then hides in the hollow oak.
6. The villain paddles across the quiet lake, then hides in the hollow oak.
7. The villain paddles across the quiet lake, then creeps into the mess hall.
8. The villain climbs up the wooden ladder, then disappears into the tall ferns.
9. The villain zips down the long zip line, then creeps into the mess hall.
10. The villain zips down the long zip line, then runs down the muddy trail.
11. The villain zips down the long zip line, then hides in the hollow oak.
12. The villain climbs up the wooden ladder, then runs down the muddy trail.
