Grade 6 math · Place value, Multi-step word problems, Bar models, Addition, Missing addends · Reading level grades 5-6

Detective: _____ Date: _____

Someone hacked the server admin account and spawned thousands of lava blocks right over the spawn castle! We must find out who did it before the whole world melts.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Griefing Glitcher is _____

Possible suspects

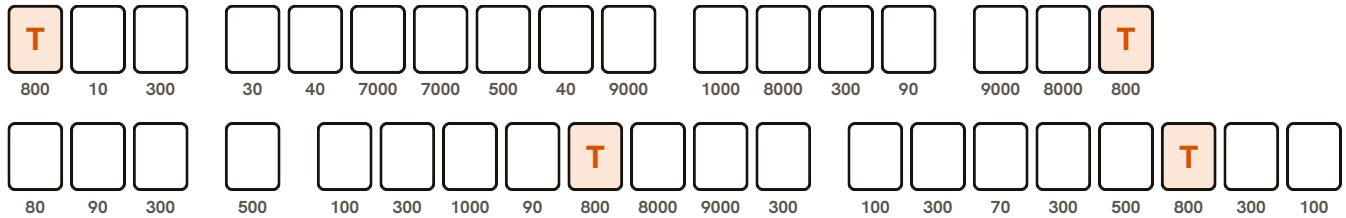

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 5**Missing addends - the last clue**

A redstone line is broken, and we must find the missing signal strength needed to power the door.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$16 + \underline{\quad} = 21$

$33 + \underline{\quad} = 35$

$38 + \underline{\quad} = 41$

$19 + \underline{\quad} = 28$

$8 + \underline{\quad} = 20$

$22 + \underline{\quad} = 26$

$1 + \underline{\quad} = 2$

$29 + \underline{\quad} = 36$

$39 + \underline{\quad} = 49$

$6 + \underline{\quad} = 12$

$34 + \underline{\quad} = 45$

Step 2 - cross out the sentence with each answer:

1. The villain uses an ender pearl to teleport, then activates a redstone repeater.
2. The villain launches a tnt blast, then eats an enchanted golden apple.
3. The villain launches a tnt blast, then digs down with a diamond pickaxe.
4. The villain soars away using elytra wings, then clutches a totem of undying.
