

The Mystery of Siren Cove

Grade 7 math · Place value, Addition, Subtraction, Multiplication, Missing addends · Reading level grades 7-9

Detective: _____ Date: _____

A rogue captain has raided the sacred vaults of Siren Cove, stealing ancient magical relics and disrupting the delicate truce between pirates and merfolk. As the chief investigator, you must use marine logs, wreckage evidence, and mathematical clues to track down the culprit before they escape across the ocean.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Pirate Captain is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$7 + \underline{\quad} = 8$

$7 + \underline{\quad} = 17$

$39 + \underline{\quad} = 43$

$23 + \underline{\quad} = 26$

$8 + \underline{\quad} = 14$

$38 + \underline{\quad} = 46$

$15 + \underline{\quad} = 24$

$20 + \underline{\quad} = 25$

$7 + \underline{\quad} = 18$

$16 + \underline{\quad} = 23$

$20 + \underline{\quad} = 32$

Step 2 - cross out the sentence with each answer:
