

The Mystery of the Golden Orchid

Grade 5 math · Addition, Subtraction, Multiplication, Fractions of a number, Division · Reading level grades 3-4

Detective: _____ Date: _____

A rare Golden Orchid has been snatched from the Great Greenhouse! A rogue plant-master is behind the heist. We must find them.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Leaf Thief is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1 Addition

Botanist Ben gathered all the dropped seed bags in the garden. By adding the bags from the path and the shed, we found a clue.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 2 Subtraction

We checked the greenhouse inventory. We subtracted the stolen flower pots from the total to see how many were left.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 3

Multiplication facts (1-12)

The team counted the rows of rare tulips. By multiplying the rows by the number of flowers in each, we cracked a lock code.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 4
Fractions of a number

We found a map of the greenhouse. Only a small fraction of the total rooms had wet footprints, helping us narrow our search.

CLUE 5**Division facts (1-12) - the last clue**

We divided the heavy bags of soil equally among the garden carts. This shared weight gave us the final number to open the vault.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$40 \div 4 = \boxed{}$

$44 \div 4 = \boxed{}$

$90 \div 10 = \boxed{}$

$8 \div 4 = \boxed{}$

$49 \div 7 = \boxed{}$

$24 \div 4 = \boxed{}$

$40 \div 5 = \boxed{}$

$15 \div 3 = \boxed{}$

$32 \div 8 = \boxed{}$

$15 \div 5 = \boxed{}$

$24 \div 2 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain sprouted thick roots through the floor, then cleared a path through the brush with a bronze rake.
2. The villain sprouted thick roots through the floor, then scooped up the golden orchid with a copper shovel.
3. The villain fired a barrage of sticky red berries, then cleared a path through the brush with a bronze rake.
4. The villain shot a thick cloud of sleeping pollen, then dug up the prized soil with a gold trowel.
5. The villain sprouted thick roots through the floor, then dug up the prized soil with a gold trowel.
6. The villain blocked the guard with a giant leaf, then scooped up the golden orchid with a copper shovel.
7. The villain fired a barrage of sticky red berries, then dug up the prized soil with a gold trowel.
8. The villain blocked the guard with a giant leaf, then dug up the prized soil with a gold trowel.
9. The villain tangled the security cameras in vines, then clipped the greenhouse locks with silver shears.
10. The villain tangled the security cameras in vines, then cleared a path through the brush with a bronze rake.
11. The villain sprouted thick roots through the floor, then clipped the greenhouse locks with silver shears.
12. The villain shot a thick cloud of sleeping pollen, then scooped up the golden orchid with a copper shovel.
