

The Mystery of the Missing Dragon Egg

Grade 3 math · Addition, Subtraction, Rounding, Multiplication, Division · Reading level grades 3-4

Detective: _____ Date: _____

Someone snuck into the town square of Craftia and swiped the legendary Ender Dragon Egg! The Head Villager needs your crafting skills to follow the blocky trail, solve the puzzles, and catch the thief!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the grieving thief is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 3 Rounding

Our block-counting radar got hit by a skeleton arrow, so it only shows rounded numbers. Round these block counts to the nearest ten to fix the screen and get the third clue!

Solve each problem, then write its letter in every clue box that shows the same number.

Round 535 to the nearest hundred → **T**

Round 698 to the nearest hundred → **D**

Round 92 to the nearest ten → **A**

Round 7,106 to the nearest thousand → **R**

Round 26 to the nearest ten → **N**

Round 42 to the nearest ten → **H**

Round 411 to the nearest hundred → **V**

Round 9,462 to the nearest thousand → **I**

Round 3,713 to the nearest thousand → **F**

Round 3,433 to the nearest thousand → **L**

Round 804 to the nearest hundred → **O**

Round 58 to the nearest ten → **S**

Multiplication facts (1-12)

The villain ran through a melon farm planted in perfect rows. Multiply the rows of melons to calculate how much food they grabbed, exposing the fourth clue.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Division facts (1-12) - the last clue**

To escape, the villain split their remaining emeralds equally among several trading villagers. Divide the emeralds to see how many each villager got and crack the final clue!

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$44 \div 4 = \boxed{}$

$20 \div 5 = \boxed{}$

$15 \div 5 = \boxed{}$

$48 \div 8 = \boxed{}$

$7 \div 7 = \boxed{}$

$80 \div 10 = \boxed{}$

$48 \div 4 = \boxed{}$

$63 \div 9 = \boxed{}$

$2 \div 1 = \boxed{}$

$25 \div 5 = \boxed{}$

$72 \div 8 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain lays down a trail of redstone dust, then grips a golden totem of undying.
2. The villain digs with a netherite pickaxe, then grips a golden totem of undying.
3. The villain digs with a netherite pickaxe, then eats a shiny golden apple.
4. The villain teleports using ender pearls, then grips a golden totem of undying.
5. The villain swings a glowing diamond sword, then eats a shiny golden apple.
6. The villain glides around on elytra wings, then pours out a hot bucket of lava.
7. The villain glides around on elytra wings, then eats a shiny golden apple.
8. The villain lays down a trail of redstone dust, then drinks a potion of swiftness.
9. The villain lays down a trail of redstone dust, then pours out a hot bucket of lava.
10. The villain swings a glowing diamond sword, then shoots a blazing fire charge.
11. The villain lays down a trail of redstone dust, then shoots a blazing fire charge.
12. The villain swings a glowing diamond sword, then pours out a hot bucket of lava.
