

The Nebula Station Theft

Grade 3 math · Skip counting, Addition, Subtraction, Rounding, Division · Reading level grades 3-4

Detective: _____ **Date:** _____

Oh no! A rogue astronaut has broken into the main control deck of Nebula Station Seven and stolen the golden star-chart! Chief Astronomer Leo needs your help. Look at the clues, solve the math, and find the thief before they escape into deep space!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the rogue astronaut is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1 Skip counting

We need to count the emergency oxygen canisters. They are stacked in rows on the supply shelf. Skip count the canisters to find the total and unlock the first clue file.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 2 Addition

The robot helper gathered energy batteries from the solar dock. Add the dock batteries to the reserve batteries to see if we have enough power to run the scanner.

CLUE 5**Division facts (1-12) - the last clue**

We have a crate of moon rocks to analyze. If we share them equally among the science teams, how many rocks does each team get? Solve this to unlock the final file.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$55 \div 11 = \boxed{}$

$10 \div 10 = \boxed{}$

$4 \div 1 = \boxed{}$

$44 \div 4 = \boxed{}$

$108 \div 9 = \boxed{}$

$96 \div 12 = \boxed{}$

$15 \div 5 = \boxed{}$

$12 \div 2 = \boxed{}$

$24 \div 12 = \boxed{}$

$99 \div 11 = \boxed{}$

$7 \div 1 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain scrambles the radar, then escapes through the waste chute.
2. The villain hacks the main terminal, then escapes through the waste chute.
3. The villain scrambles the radar, then slips into the dark nebula.
4. The villain disables the solar shield, then flees in a mini shuttle.
5. The villain scrambles the radar, then jumps into the hyperdrive pod.
6. The villain blocks the airlock, then slips into the dark nebula.
7. The villain blocks the airlock, then zooms away on a space jetpack.
8. The villain scrambles the radar, then zooms away on a space jetpack.
9. The villain zaps the control panel, then flees in a mini shuttle.
10. The villain disables the solar shield, then zooms away on a space jetpack.
11. The villain scrambles the radar, then flees in a mini shuttle.
12. The villain disables the solar shield, then escapes through the waste chute.
