

The Temple of Mount Mango

Grade 5 math · Multiplication, Word problems, Fractions of a number, Order of operations, Division · Reading level grades 3-4

Detective: _____ Date: _____

A sneaky thief has run off with the golden monkey statue from the Mount Mango Temple! The Chief Explorer needs your help to track down the culprit before they escape the jungle.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Temple Raider is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1

Multiplication facts (1-12)

The Chief Explorer finds rows of ancient stone tiles blocking the path. We must multiply the rows of tiles to find the secret path forward.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 2

Word problems

We find a scrap of paper from the thief's notebook. It has a word problem about trail mix supplies that we need to solve to get our next lead.

Solve each problem, then write its letter in the boxes to fill in the missing word.

CLUE 3
Fractions of a number

A locked chest sits by the river. To open it, we must calculate a fraction of the total gems carved into the lid.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 4 Order of operations

An ancient stone dial has several math symbols. We must follow the strict rules of operations in the correct order to spin the dial safely.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Division facts (1-12) - the last clue**

We find a pack of supplies left behind by the thief. We must divide the heavy gold coins equally among our team to carry them back.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$12 \div 1 = \boxed{}$

$88 \div 11 = \boxed{}$

$99 \div 11 = \boxed{}$

$32 \div 8 = \boxed{}$

$2 \div 2 = \boxed{}$

$28 \div 4 = \boxed{}$

$33 \div 11 = \boxed{}$

$15 \div 3 = \boxed{}$

$2 \div 1 = \boxed{}$

$88 \div 8 = \boxed{}$

$10 \div 1 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain climbs up a steep stone wall, then slides down a rusty zip line.
2. The villain chops through the thick brush, then floats away in a hot air balloon.
3. The villain chops through the thick brush, then speeds off on a noisy dirt bike.
4. The villain swings on a thick jungle vine, then drives off in a muddy jungle buggy.
5. The villain peers through a brass spyglass, then paddles away on a bamboo raft.
6. The villain sweeps the ground for traps, then speeds off on a noisy dirt bike.
7. The villain chops through the thick brush, then paddles away on a bamboo raft.
8. The villain climbs up a steep stone wall, then speeds off on a noisy dirt bike.
9. The villain sweeps the ground for traps, then slides down a rusty zip line.
10. The villain swings on a thick jungle vine, then paddles away on a bamboo raft.
11. The villain sweeps the ground for traps, then floats away in a hot air balloon.
12. The villain climbs up a steep stone wall, then drives off in a muddy jungle buggy.
