

The Theft of the Golden Blossom

Grade 5 math · Multiplication, Subtraction, Fractions of a number, Multi-step word problems, Division · Reading level grades 5-6

Detective: _____ **Date:** _____

The Golden Blossom, the magical flower that keeps the Prism Waterfall flowing, has been snatched from its glass dome in the Shimmering Meadows! The Grand Council of Unicorns suspects one of their own has gone rogue. Detective, we must analyze the magical residue left behind and track down the culprit before the waterfall dries up forever!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Rogue Unicorn is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1
Multiplication facts (1-12)

To decode the magical spell lock on the Golden Blossom's empty dome, we counted the rows of glowing runes. Each of the rune panels has several rows, and multiplying them reveals a secret about the villain's extra power.

Solve each problem, then write its letter in every clue box that shows the same number.

The rogue unicorn left a trail of heavy steps. We calculated how much magical energy was lost from the meadow's reserve by subtracting the remaining energy from the starting total, which exposed their special sparkle tell.

CLUE 5**Division facts (1-12) - the last clue**

The herd wants to share the remaining starry apples equally. Splitting the harvest into equal groups points us directly to the direction the thief fled to help us confirm their final trait.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$81 \div 9 = \boxed{}$

$90 \div 9 = \boxed{}$

$10 \div 2 = \boxed{}$

$21 \div 7 = \boxed{}$

$49 \div 7 = \boxed{}$

$7 \div 7 = \boxed{}$

$96 \div 8 = \boxed{}$

$18 \div 3 = \boxed{}$

$64 \div 8 = \boxed{}$

$24 \div 6 = \boxed{}$

$88 \div 8 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain sculpts a heavy storm cloud, then charges the air with pure starlight.
2. The villain conjures sharp purple crystals, then causes wild floral blooms to grow.
3. The villain conjures sharp purple crystals, then bends the bright northern aurora.
4. The villain teleports with bright sparkles, then charges the air with pure starlight.
5. The villain teleports with bright sparkles, then blasts a loud sonic whinny.
6. The villain conjures sharp purple crystals, then charges the air with pure starlight.
7. The villain sculpts a heavy storm cloud, then blasts a loud sonic whinny.
8. The villain sculpts a heavy storm cloud, then hovers off the ground with levitation.
9. The villain conjures sharp purple crystals, then blasts a loud sonic whinny.
10. The villain teleports with bright sparkles, then hovers off the ground with levitation.
11. The villain teleports with bright sparkles, then causes wild floral blooms to grow.
12. The villain creates a glowing rainbow shield, then bends the bright northern aurora.
