

The Tokyo Bay Titan Emergency

Grade 5 math · Multiplication, Fractions of a number, Order of operations, Rounding, Division · Reading level grades 5-6

Detective: _____ **Date:** _____

A rogue pilot has slipped into the high-tech military hangar and stolen the experimental Titan-Lure transmitter! If they activate it, a giant sea monster sleeping deep under Tokyo Bay will wake up. You must scan the clues and track down the culprit before the monster rises.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the rogue pilot is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

Multiplication facts (1-12)

Our scouts found rows of shipping containers knocked over by the escaping mech suit. If there are several neat rows of crates, we can multiply them to find the total damage.

CLUE 5**Division facts (1-12) - the last clue**

We need to distribute the remaining energy shields equally among our shoreline defense towers. Dividing the total shield units by the number of active towers will keep Tokyo safe.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$84 \div 7 = \boxed{}$

$56 \div 8 = \boxed{}$

$5 \div 1 = \boxed{}$

$70 \div 7 = \boxed{}$

$40 \div 10 = \boxed{}$

$56 \div 7 = \boxed{}$

$14 \div 7 = \boxed{}$

$81 \div 9 = \boxed{}$

$33 \div 3 = \boxed{}$

$3 \div 1 = \boxed{}$

$42 \div 7 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain steals the mech keycard, then races toward the shoreline.
2. The villain disables the security grid, then races toward the shoreline.
3. The villain overloads the reactor shield, then speeds off in an armored jeep.
4. The villain hacks the tracking radar, then escapes in a stealth sub.
5. The villain overloads the reactor shield, then races toward the shoreline.
6. The villain disables the security grid, then flees into the foggy bay.
7. The villain bypasses the titanium vault, then leaps onto the launch pad.
8. The villain bypasses the titanium vault, then races toward the shoreline.
9. The villain disables the security grid, then speeds off in an armored jeep.
10. The villain steals the mech keycard, then flees into the foggy bay.
11. The villain steals the mech keycard, then leaps onto the launch pad.
12. The villain disables the security grid, then escapes in a stealth sub.
